INTRODUCING
BALANCED WATER
BY

iliv

There's a lot more to water than just purification. The device you see is inspired by some of the finest products in the world of water treatment. We compiled the best of ideas, the smartest of features, and we put them together into one product that does one simple thing - gives you water that is as nature intended it to be. **Hello, iLiv.**

This is the part where you'd usually expect to find some complicated description of technology that no one really understands. Instead, we'll tell you we use the technology for. iLiv is built to dispense water that is

- » **Clean, of course;**
- » **Fortified with essential minerals – magnesium, calcium, all the good stuff;**
- » **pH-balanced - no more, no less. Just right.**

And perhaps the feature we're most proud of is that iLiv does all of this without wasting a single drop - do we have your attention now? Unlike traditional water purification systems, iLiv saves and reuses every last bit of water, with no additional equipment required.

Speaking of additional equipment, iLiv comes with functions that can replace multiple kitchen appliances, reducing your carbon footprint and increasing your kitchen counter space. The inbuilt heater gives you hot water at the touch of a button, making kettles redundant. Equally, you'll never need to put water bottles in the fridge again. iLiv cools your water and dispenses it at about 15°C, or at ambient temperature. And just like these appliances, you can put your concerns about hygiene to rest. iLiv's ozone-generating detoxifier is the simplest, most convenient way to clean and disinfect fruit and vegetables. It expels germs, and protects nutrients.

That's what iLiv is about - removing everything unnecessary from your water (and your life), while preserving the things you need. When it comes down to it, it really is that simple.

WHAT IS BALANCED WATER?

iLiv uses ultrafiltration and reverse osmosis to rid your water of toxins and pollutants. The process also depletes the natural minerals in water, which are essential for your health, and reduces its alkalinity.

To rectify this, iLiv uses a unique four-in-one cartridge to reintroduce minerals such as ionized calcium, magnesium, potassium, and sodium into your water, making it healthier. It also raises the water's pH level to between pH8.5 and pH10, which helps reduce acidity in your body.

Water that has a healthy level of alkalinity and nutrients, without any harmful germs, dissolved toxins is what we call *balanced water*.

CLEANSE & DETOXIFY AT THE TOUCH OF A BUTTON

The new normal forces us to take sanitization more seriously. To help you detoxify fruits, vegetables, eggs, and packaged goods easily and effectively, iLiv comes with a built-in ozone generator. It safely and conveniently cleanses things without any harsh chemicals or detergents.

SERVED HOT OR COLD, AS YOU PLEASE.

iLiv is designed to dispense hot and cold water instantly, at the touch of a button. When you press the hot water button (which is protected by a child lock, to avoid accidents) it immediately gives you water that is heated up to 95°C. The temperature of the water is also visible on the iLiv system's intelligent display.

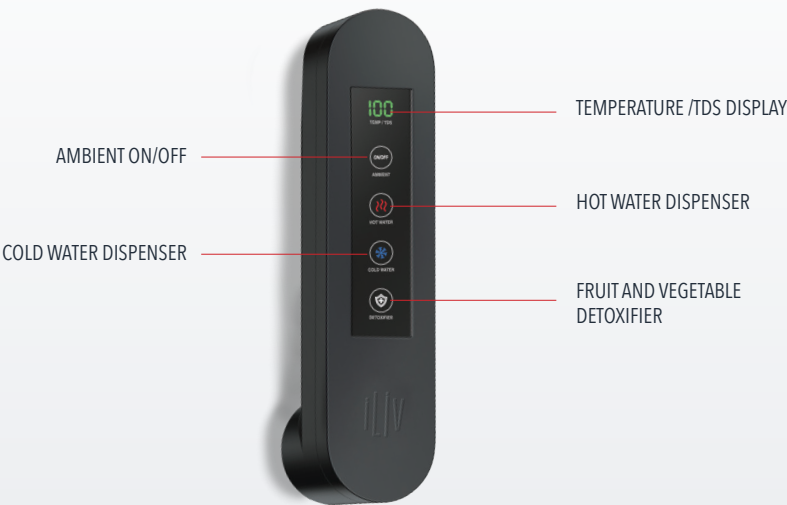

And when you want a chilled glass of water, don't reach for the refrigerator. iLiv also cools your water so that you can pour yourself a fresh, refreshing glassful when you want it.

EVERY DROP COUNTS

iLiv preserves the natural balance of water by ensuring that none of it goes to waste. To purify one glass of water, reverse osmosis systems tend to waste three glasses. iLiv collects this purified waste water and returns it to your water tank, so that it can be used again.

INDICATIONS

UNDER THE COUNTER (UTC) CONTROL PANEL

WALL MOUNT CONTROL PANEL

SPECIFICATIONS

| | |
|---|--|
| AVAILABLE IN TWO MODELS : 1. RO (REVERSE OSMOSIS) PURIFIER 2. UF (ULTRA FILTRATION) PURIFIER | UTC POWER CONSUMPTION : COOLING (120W), HEATING (1100W), OZONE GENERATOR (50W), RO (30W) |
| APPLICATION TYPES : UTC / TABLE TOP / BUILT-IN / WALL MOUNT | COLD WATER STORAGE (UTC & WALL MOUNT) : 1.2 LTRS. HOT WATER STORAGE (UTC) : 1.2 LTRS. |
| INBUILT PRE-FILTER HOUSING | LED SCREEN FOR INDICATIONS SUCH AS TANK FULL, AUTO FLUSHING, PURIFYING, ETC. |
| EASY TO REPLACE 2-IN-1 PRE-FILTER CARTRIDGE | TDS & HOT WATER TEMPERATURE DISPLAY |
| PRE-FILTER CARTRIDGE REPLACEMENT INDICATOR ON DISPLAY SCREEN | INTELLIGENT MEMBRANE FLUSHING SYSTEM |
| 4- IN-1 FILTER CARTRIDGE FOR BALANCED pH, MINERALS, NEGATIVE ORP, AND HYDROGEN-RICH WATER | 9-STAGE FILTRATION : PP, CTO, GAC, RO MEMBRANE, UV STERILISER LAMP, BIO+AA ALKALINE, MINERALS, HYDROGEN, ORP FILTER |
| FRUIT AND VEGETABLE DETOXIFICATION THROUGH OZONE GENERATOR | INPUT POWER SUPPLY - AC 220 VOLT |
| TOUCH DISPLAY PANEL | SMPS DC POWER SUPPLY 24 VOLT 1.7 AMP |
| INSTANT COLD WATER | RO BOOSTER PUMP 24 VOLT 75 GPD |
| INSTANT HOT WATER (UPTO 95°C) | 75 GPD RO MEMBRANE SHEET |
| WALL MOUNT : CHILD SAFETY LOCK FOR HOT WATER DISPENSING | THERMO - ELECTRIC DUAL WATER COOLING SYSTEM |
| UTC : LONG PRESS FOR HOT WATER DISPENSING (CHILD SAFETY) | ELECTRONIC WATER LEVEL CONTROL SWITCH (HPS) |
| WALL MOUNT : INBUILT 8 LITRE WATER STORAGE TANK | AUTOMATIC DRY RUN PROTECTION SWITCH (LPS) |
| UTC : INBUILT 10.5 LITRE WATER STORAGE TANK | WALL MOUNT DIMENSIONS : (W) 20" X (H) 16" X (D) 11" |
| WALL MOUNT POWER CONSUMPTION : COOLING (120W), HEATING (2100W while dispensing), OZONE GENERATOR (50W), RO (30W) | UTC DIMENSIONS : MACHINE - (W) 20" X (H) 16" X (D) 11" HYDROSTATIC TANK - (L) 11" X (W) 11" X (H) 15" |
